Drug plan must be modified

Our Medicare drug plan is being touted by national health magazine with the word “may” be cheaper than Canadian drugs. A very sketchy way of presenting their argument brings to mind the adage “Figures lie when liars figure.” Our drug plan is as full of holes as Swiss cheese and smells as bad as rank Limburger. An honest review board as to the efficacy of the adopted drug plan would give it zero due to the lack of understanding, clarity and adaptability by the general public.

This cabal of insurance companies are in league with pharmaceutical manufacturers to wring every last dollar from food, rent and the necessities of life from the people least able to pay for it.

Don't hand me that garbage that the indigent are being taken care of when you are disqualified if you have \$2,000 in the bank. Even the indigent have trouble receiving their drugs as of today.

Our population can and must be served in a fair and just manner. A one-sided dispensing of drugs that brings obscene profits must and can be modified.
